KIDCARE

Smarter Care. Healthier Childhood.

AI-Powered Healthcare Automation for Coordinated Pediatric Chronic Care

An n8n-based system that connects children, caregivers and healthcare teams through 5 integrated workflows to support diabetes and asthma care.

1. Project Overview
- Pediatric chronic care
- Diabetes & Asthma

2. Business Problem
- Fragmented care
- Missed follow-ups

3. Solution
- 5 n8n workflows
- Integrated care system

4. Core Features
- Personalized care plans
- Education & monitoring

5. Architecture
- 5 connected workflows
- n8n orchestration

6. AI Components
- LLM
- RAG & content generation

7. Tech Stack
- n8n
- OpenAI

8. Development
- 5 phases
- Iterative build

9. Deployment
- Cloud-based
- Monitoring & alerts

11. Eeliverables
- Working system
- Demo & docs

System Architecture

User (Child / Caregiver / Healthcare Team) → n8n (5 Workflows (Orchestrator)) → AI Models (LLM) → Database (Case Data) → External APIs (Knowledge Sources) → Dashboard (Monitoring & Alerts)

Shared Services & Tools

AI Components

- RAG
- Prompt Engineering
- Content Generation

LLM

- Classification
- Monitoring & Evaluation
- Human-in-the-Loop

Technology Stack

- n8n
- OpenAI
- PostgreSQL
- LangChain
- Python
- Docker

Development Timeline

1. Planning
2. Design
3. Implementation
4. Testing
5. Deployment

Project Outcomes

- Working System
- Dashboard
- Source Code
- Documentation
- REST API
- Deployment

Better coordination.
Smarter support.
Healthier futures.
